Smart Expense Split & Expense Manager

Web Application · A Splitwise Clone built with Django

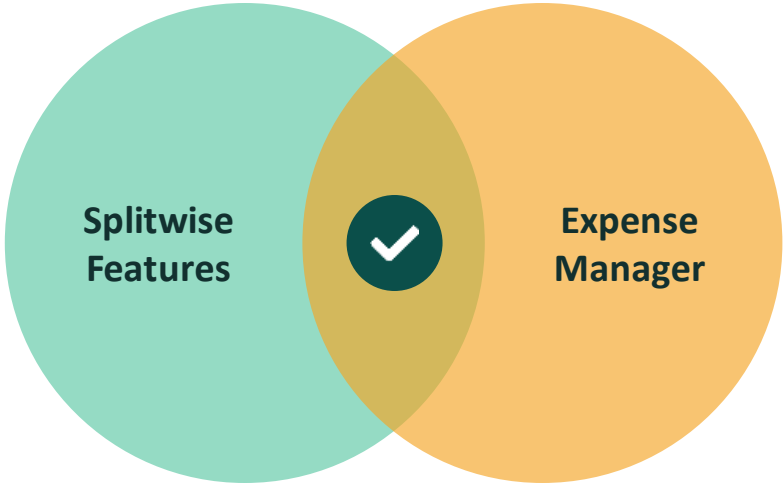

Major Project Presentation

Developed by Adesh Lokhande

Introduction

- Managing shared expenses by hand is confusing and slow.
- Friends, roommates, families and teams struggle with calculations and records.
- This project combines group splitting with personal expense tracking.
- The app automates expense tracking and balance calculation.

Problem Statement

Manual splitting wastes time

Users forget payment records

Hard to track who paid and who owes

Group expenses lack transparency

Existing apps feel too complex

Result: confusion, delays and arguments over money

Objectives

1. Build a smart expense management platform
2. Simplify group expense splitting
3. Calculate balances automatically
4. Track personal and shared expenses
5. Keep a clear payment history

Proposed System

Create groups and add members

Add shared expenses

Split equally or manually

Track settlements

Manage personal daily expenses

View reports and summaries

Main Features

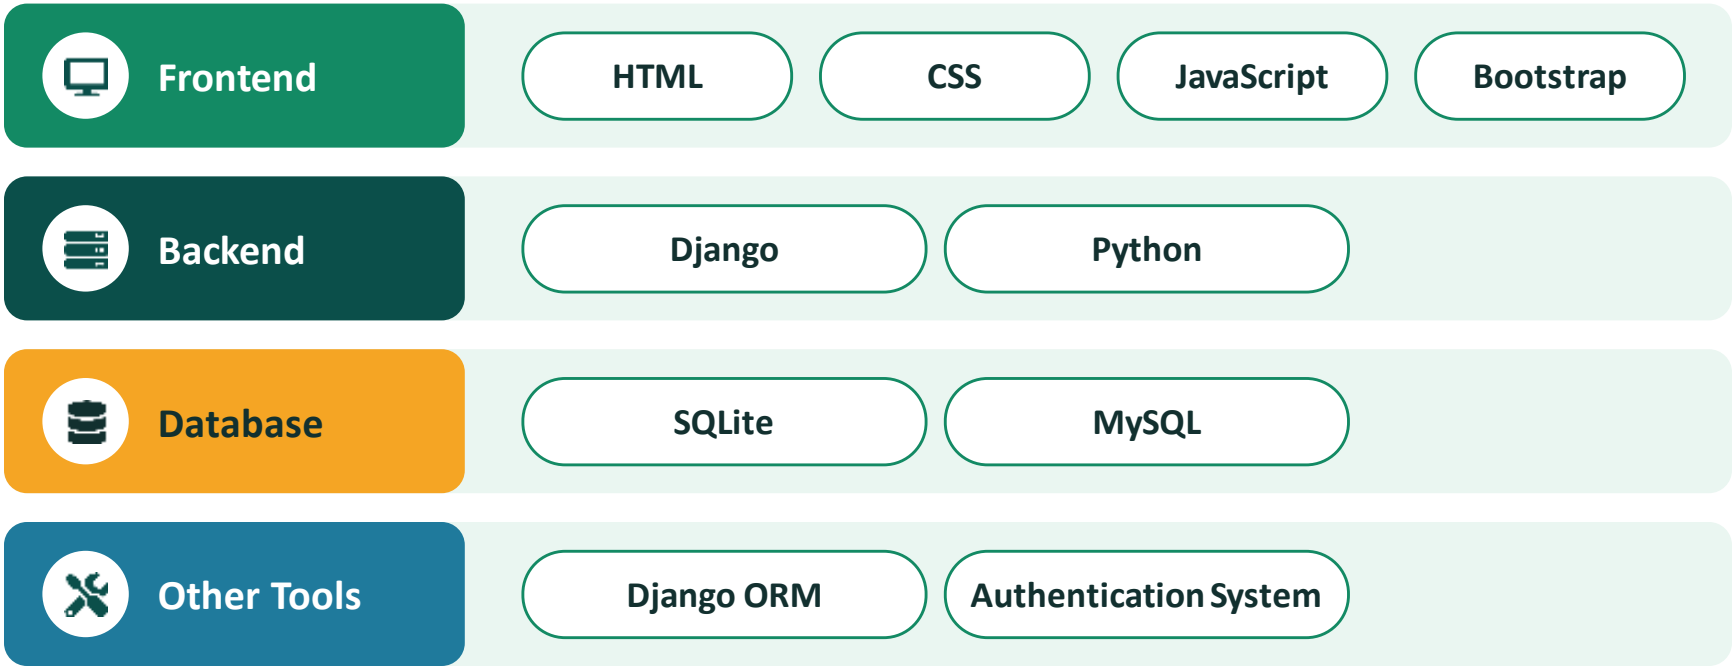

Splitwise Features

- Group creation
- Expense splitting
- Auto balance calculation
- Settlement tracking

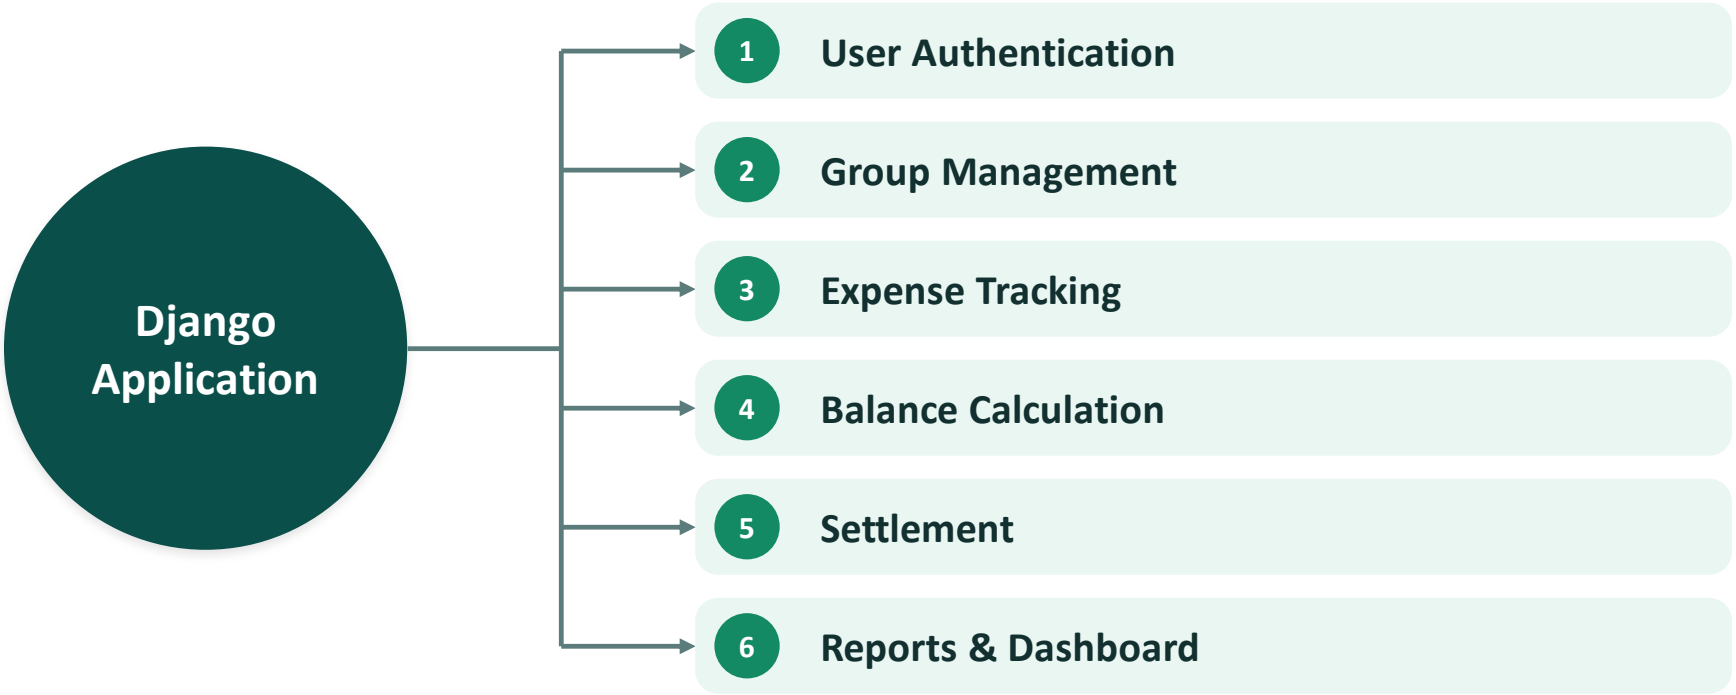

Expense Manager Features

- Daily expense tracking
- Category-wise expenses
- Monthly summaries
- Budget monitoring

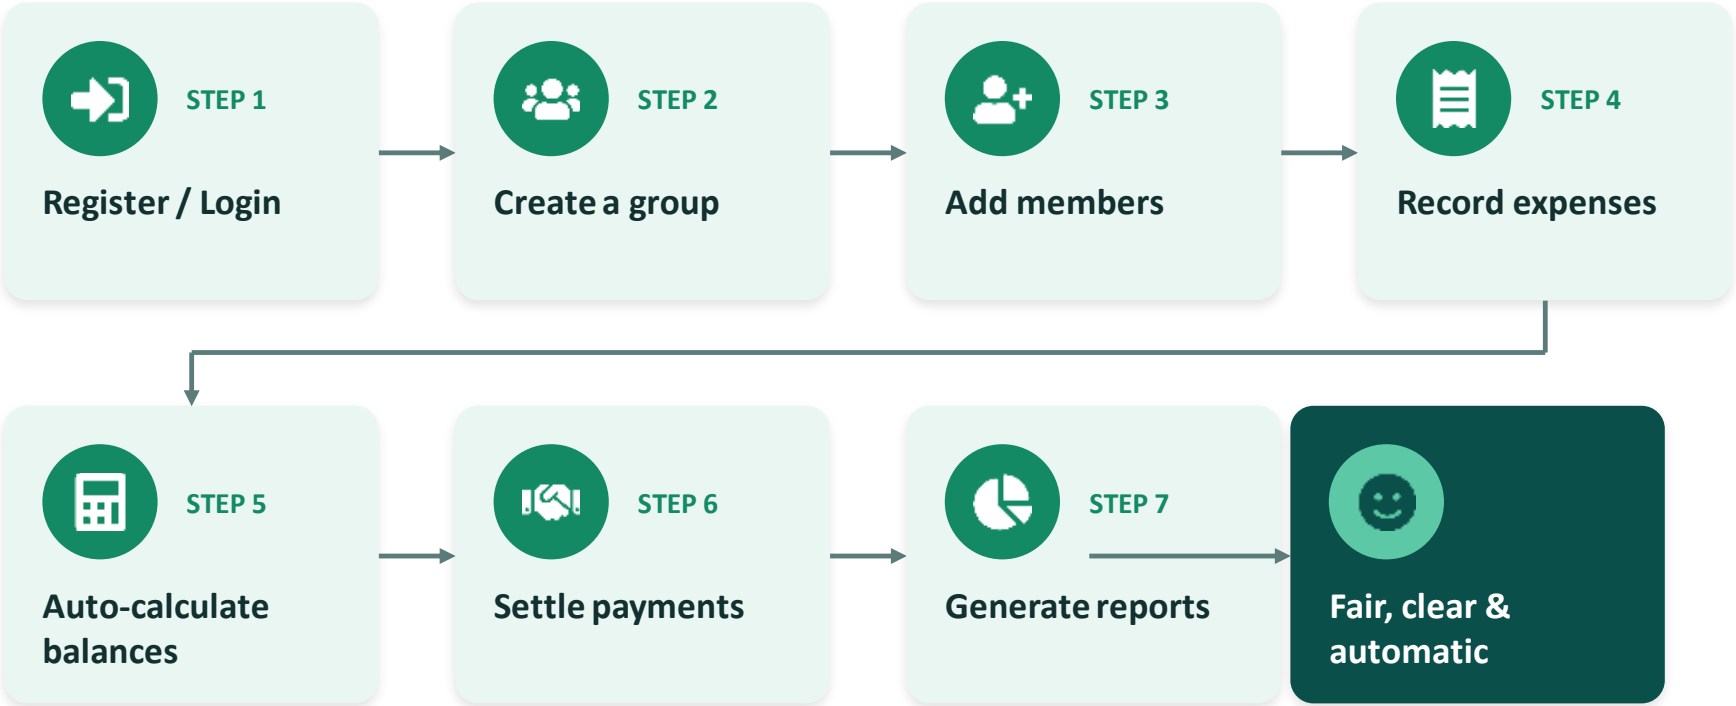

Technology Stack

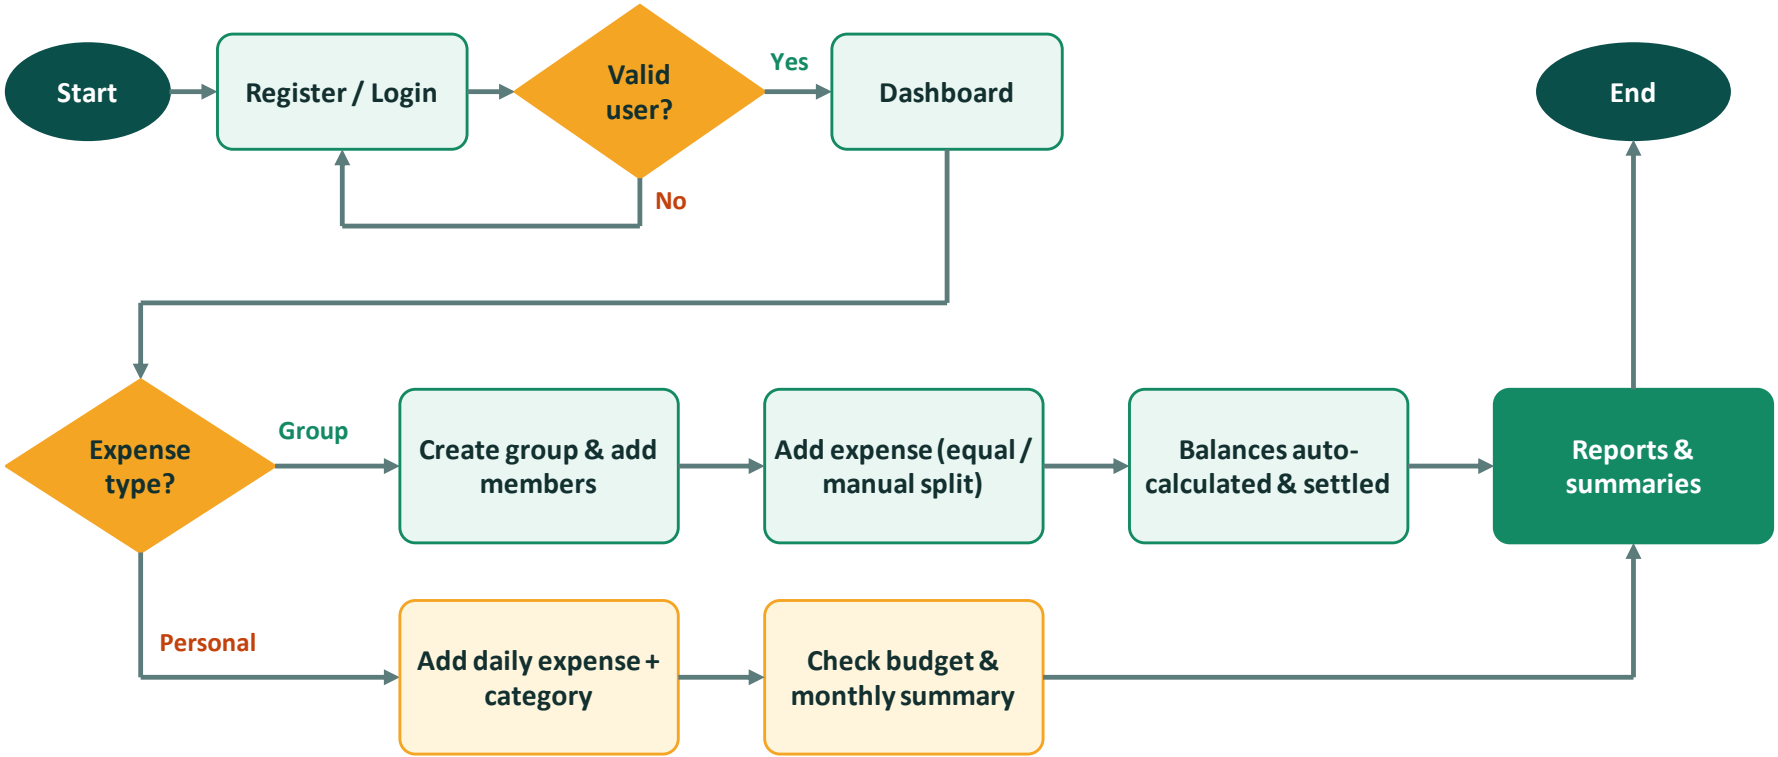

System Architecture

Working Flow

Application Flowchart

Example: How Splitting Works

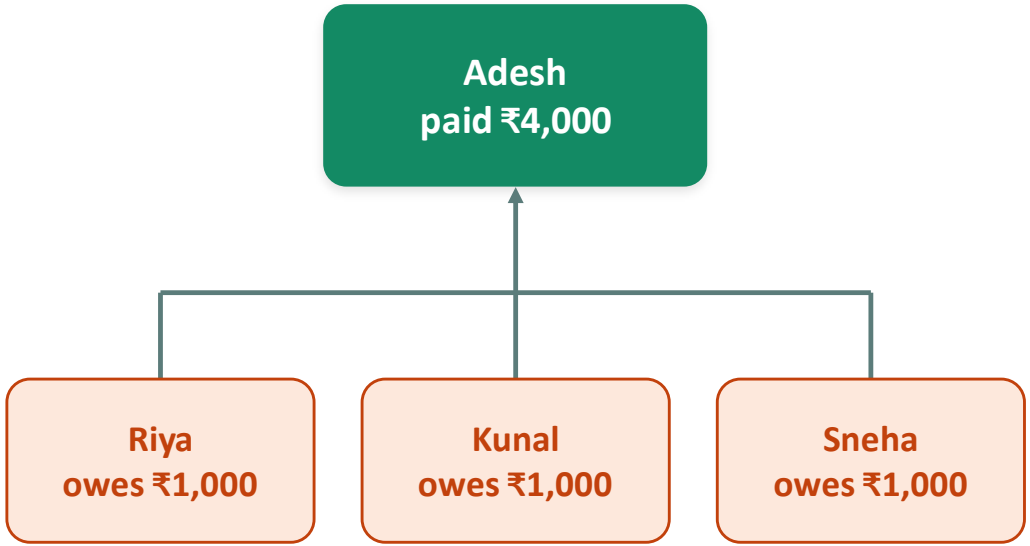

EXAMPLE

Dinner bill

₹4,000

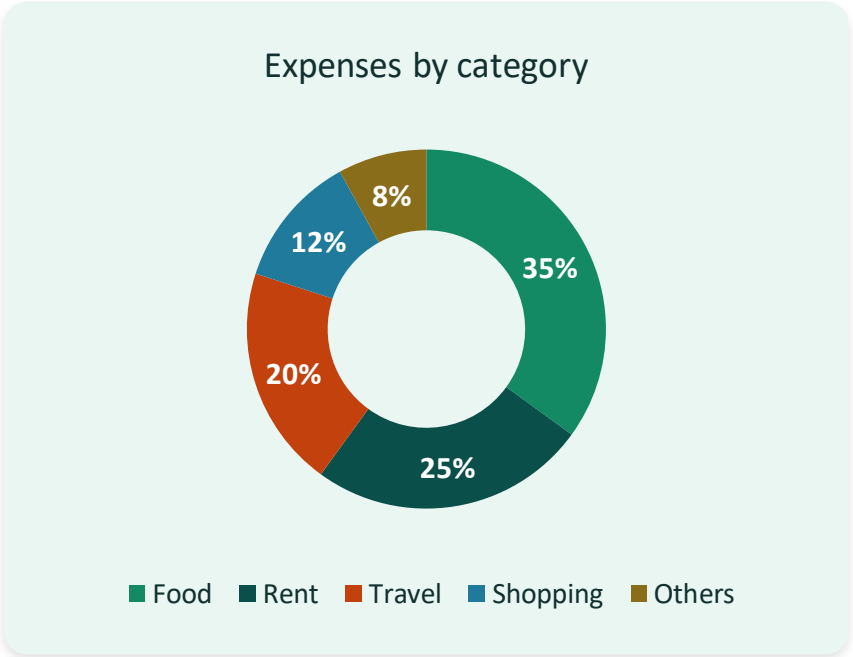

paid by Adesh, split equally among 4 friends

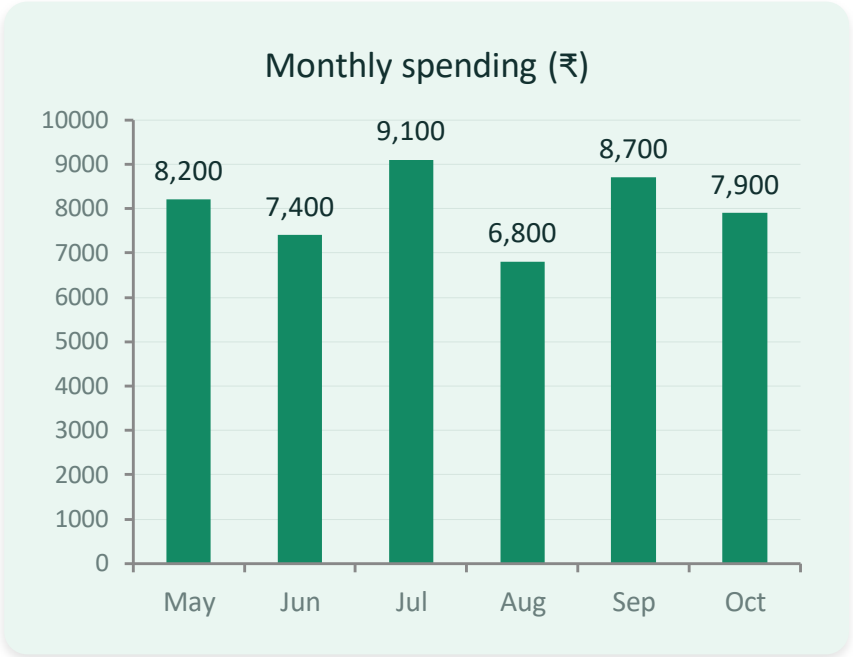

Each share = ₹1,000

Net result: Adesh gets ₹3,000 back, calculated automatically

Reports & Dashboard

Sample data for illustration

Advantages

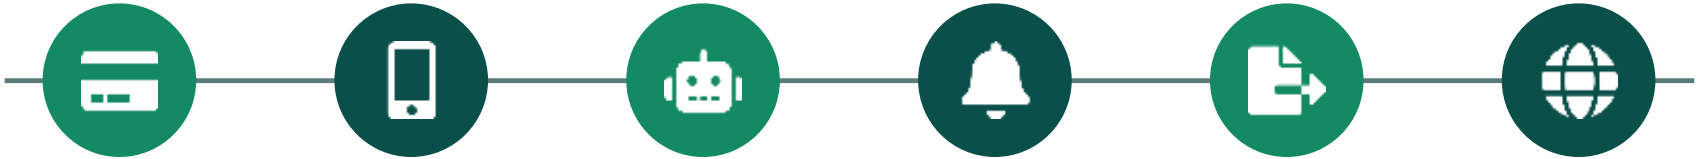

- Easy-to-use interface
- Saves time
- Fewer calculation errors
- Better financial transparency
- Secure data management
- Great for students, roommates, families and teams

Future Enhancements

UPI / payment gateway

AI expense analysis

PDF / Excel export

Mobile app

Reminders & notifications

Multi-currency support

Conclusion

- A complete smart expense management solution
- Combines Splitwise features with personal expense tracking
- Helps users manage money efficiently
- Shows real-world Django web development concepts
- Improves transparency and reduces conflicts

Thank You!
